

Singularities of Differentiable Maps: v. 2: Monodromy and Asymptotics of Integrals

By V. I. Arnold, S. M. Gusein-Zade, A. N. Varchenko

BIRKHAUSER BOSTON INC, United States, 2012. Paperback. Book Condition: New. 2012 ed.. 246 x 229 mm. Language: English . Brand New Book. The present volume is the second in a two-volume set entitled Singularities of Differentiable Maps. While the first volume, subtitled Classification of Critical Points and originally published as Volume 82 in the Monographs in Mathematics series, contained the zoology of differentiable maps, that is, it was devoted to a description of what, where, and how singularities could be encountered, this second volume concentrates on elements of the anatomy and physiology of singularities of differentiable functions. The questions considered are about the structure of singularities and how they function.

Reviews

Thorough manual for ebook fans. it had been writtern quite properly and valuable. It is extremely difficult to leave it before concluding, once you begin to read the book. -- Dr. Catherine Wehner

Absolutely among the best book I have possibly go through. I have go through and that i am certain that i am going to gonna read through once again again in the future. I am just delighted to tell you that this is basically the finest book i have got go through within my personal existence and could be he finest book for ever. -- Brian Bauch
